Announcements and Information Inquiry:

- a) Highland Township Offices will be closed on Monday, 01/16/23, in observance of Martin Luther King, Jr. Day

Public Comment:

Mr. Salvia commented well done on the township hall. Mr. Hamill acknowledged the Summit Company, the general contractor, did a phenomenal job, the contractors and their employees were excellent to work with. The Project Manager from Lindhout Associates Architect, Mike O'Leary, who is a Highland Resident, is as good an architect that you could hope to work with. Some items needed to be worked out on site and he was willing to make modifications and did a stellar job with the building. Mr. Hamill acknowledged the one single employee, Beth Corwin, who spent a tremendous amount of time to put all the pieces together that made our move out and back flawless. The rest of the staff did a great job and showed real teamwork. A resident recognized the Milford Basketball Team for their success and encouraged them for the rest of the season as they approach the playoffs. Norm Huling from Norm's Ice Cream passed away. He was a longtime resident of Highland Township and brought much happiness directly and indirectly to many families. Congratulations to the Township Board and Supervisor for making the building project happen.

Presentation:

- a) Swearing-in of Fire Fighter/Paramedic Kenworthy, Fire Fighter/EMT Moreno, and Fire Fighter/EMT Martin

Fire Fighters were not available.

Pending Business:

- a) Approval of Special Land Use for Wireless Communication Facility at Duck Lake Pines Park, parcel 11-24-176-004; applicant C&W Consultants on behalf of Verizon Wireless and property owner Highland Township

Mr. Colton Curtis from C & W Consultants presented on behalf of Verizon Wireless. Mrs. Cooper moved to approve the Special Land Use as presented for Wireless Communication Facility at Duck Lake Pines Park, parcel 11-24-176-004, applicant C&W Consultants on behalf of Verizon Wireless and property owner Highland Township. Mr. Howe supported, and the motion carried with the following roll call vote: Hamill – yes, Flowers – yes, Frederick – yes, Cooper – yes, Howe – yes, Lewis – yes, Salvia – yes.

Adjourn:

Supervisor Hamill adjourned the meeting at 7:15 p.m.

Tami Flowers, MiPMC
Highland Township Clerk

Rick A. Hamill
Highland Township Supervisor

CHARTER TOWNSHIP OF HIGHLAND
DOWNTOWN DEVELOPMENT AUTHORITY
Record of the December 21, 2022 Regular Board Meeting

Members Present: Supervisor Hamill, Chris Hamill, Jennifer Frederick, Roscoe Smith, Cassie Blascyk, Dale Feigley

Staff Present: Melissa Dashevich, Executive Director
Karen Beardsley, Recording Secretary

Members Absent: Michael Zurek, Matt Barnes

Mr. Smith called the meeting to order at 6:16 p.m.

Approve Minutes of Regular Board Meeting of November 16, 2022

MS. FREDERICK MOVED TO APPROVE the Regular Board Meeting minutes of November 16, 2022 as presented. MRS. HAMILL SUPPORTED THE MOTION and THE MOTION CARRIED with a unanimous voice vote (6 yes votes).

Director's Report

Mrs. Dashevich has been working up to 50 hours per week for the past few weeks, concentrating on holiday plans as well as upcoming assessment; also, working with Ms. Blascyk on website content, as well as reviewing award nominations for MSOC's Main Event in May.

Treasurer's Report

Mrs. Hamill shared that revenue over expenses is \$107,095. Some discussion took place regarding the origin and impact of the Local Community Stabilization amount. Cash at end of November is at \$468,558.00. Long term loan is at \$77,422. TIF was expect to be around \$209,000, but came in at \$182,000, around \$26,000 below what was budgeted. Ms. Frederick confirmed that the TIF money will be coming in until Feb 14. Some delinquencies may have to be repaid. All in all, in good financial shape.

NEW BUSINESS

- Budget Discussion – Splitting Director's Salary and Medical Allowance in separate line items. The Director's salary and medical buyout are lumped in one line item. The township would like to see them split into separate line items, and if a salary percentage increase is approved, it should be on the salary portion only.

MS. FREDERICK MOVED TO APPROVE the addition of line item #494-729-715.000 (Medical Buyout) to the budget, and to move \$6,000 from #494-729-702.001 (DDA Director Salary) to the new line item. MR. FEIGLEY SUPPORTED THE MOTION and THE MOTION CARRIED with a roll call vote: R. Hamill-yes; C. Hamill-yes; Frederick-yes; Blascyk-yes; Feigley-yes; Smith-yes.

Mrs. Blascyk asked that the subject of an increase to her wages be brought up in the new year, as it was tabled from the budget meeting in November, and was to be revisited in the new year.

- Local Newspapers
Mrs. Dashevich and Mrs. Blascyk have spoken to a local digital newspaper (Crystal at Oakland Times) who has offered to do feature stories on Highland if they get participation in advertising. It would be a \$7,800 annual contract. Mrs. Blascyk suggests we do this as well as billboard advertising. The billboard across from the school is available beginning July 3rd for 3 months (through September 24th). The cost would be \$1,600/4 weeks with 12 week minimum and \$150 to print and install artwork. Artwork can be changed during that 3 month period for an additional \$150. Some discussion took place regarding the content, not to be too overloaded.

Regarding the digital media, Supervisor Hamill suggested that if we were to use that service, we should be selling ads to local businesses to not only recoup some of our costs, but to perhaps generate some revenue. But she may want to be the one to sell ads herself. Who would provide the content? It was suggested that we invite this person to present at a future DDA meeting so we can ask questions.

MS. FREDERICK MOVED TO APPROVE billboard advertising (across from MHS) for the time period of 3 months (7/3/23 through 9/24/23) including 2 artwork print and install for an amount not to exceed \$5,200. MR. FEIGLEY SUPPORTED THE MOTION and THE MOTION CARRIED with a roll call vote: R. Hamill-yes; C. Hamill-yes; Frederick-yes; Blascyk-yes; Feigley-yes; Smith-yes.

- DDA Offices
Mrs. Dashevich asked about the Director's office moving into the DDA prior conference area. This could be office space as well as conferencing/layout with Mrs. Blascyk. There was concern with people asking to use it as conference space, but it was agreed that conference rooms will be available at the new township offices. All felt the DDA Executive Director could benefit from having additional space and she will begin her move once WOTA has gone.

OLD BUSINESS

- Main Street America/MSOC Evaluation January 18th
New assessment framework
Mrs. Dashevich feels this is much of the same information, just in a new framework. She will be reviewing it in more detail over the coming weeks.
- TIF renewal
Mr. Feigley suggested assigning a tab to each board member for initial review. Mrs. Dashevich has the file electronically, but could print it as well. Supervisor Hamill felt we might benefit from professional help in this review. It was agreed that Supervisor Hamill will make copies and bring them to the February meeting for an initial board review.

BOARD MEMBER COMMENTS

None.

COMMITTEE REPORTS

Design

Mrs. Blascyk shared that the committee opened 7 bids received for Wayfinding. They are reviewing and will bring findings to an upcoming meeting. Mr. Feigley shared a list he made of areas he felt should be included in wayfinding directional signs.

Economic Vitality

Earth n Soul has received rental subsidy and will remain open into 2023.

Promotions

Tree Lighting event. – Ms. Frederick shared that the popcorn vendor, “Howdy’s Old Tyme Popcorn” (owned by Heidi and John) who provided Hot Cocoa and Popcorn at the Tree Lighting, brought in a Christmas card to the township with a check for \$300 for Community Sharing. They received tips that evening in the amount of \$150 and matched that amount in a donation to Community Sharing.

A very successful event; much positive feedback received. Market was a success as well. Perhaps additional signage and ambient lighting for next year. Also look into closing road for next year.

Organization

- Mission and vision statements have been discussed and will be presenting soon.

DISTRICT DEVELOPMENT / NEW BUSINESS

- Prime BBQ will be opening February 1. There is some doubt that they have followed any guidelines, and may be experiencing some difficulty in proceeding.

COMMUNITY REPORTS

- HVCA is presenting Sound Session on January 21st from 7 – 8:30 pm. They are 4 saxophone players from MSU.

CALL TO THE PUBLIC

None.

Mr. Smith adjourned the meeting at 7:55 p.m.

Respectfully submitted,
Roscoe Smith

Charter Township of Highland - Fire Department

**1600 W. Highland Rd.
Highland, MI 48357
(248)887-9050**

TO: Highland Township Board

FROM: Ken Chapman, Fire Chief

SUBJECT: E-2 Update

DATE: February 6, 2023

We rec'd the new Engine 2 on January 12, 2023. This vehicle is a 2022 Freightliner chassis with a Rosenbauer box (Commercial Cab configuration).

Brand new this vehicle will cost between \$500,000 and \$550,000. This vehicle was being used by Emergency Vehicles Plus, Inc (supplier) as a demo. They would parade the vehicle around to show departments the quality of their product. Because the vehicle had miles on it, we were fortunate enough to purchase the vehicle at a discounted rate (\$367,450). While not exactly what we wanted, it met the needs to service Fire Station #2's response district. Not only did we receive the apparatus at a significantly discounted price, most manufacturers are 18-24 months out from order to delivery of their apparatus. We rec'd the vehicle as soon as funds were available.

The apparatus is currently at Fire Station #1 having equipment mounted. Much of the equipment being mounted is from the 1998 Seagraves that was removed from service in 2020 due to a cracked frame rail. There are several pieces that are currently on order, and these pieces are primarily due to the changes in our service model.

We hope to have all equipment received and mounted within the next 2 weeks. Soon after, we will have a "Push In" ceremony. We will advertise on our social media pages, and invite the public to be involved.

Any questions, please contact the Chief's office.

6. Announcements and Information Inquiry

- a) Highland Township Offices will be closed Monday, 02-20-23, in observance of Presidents' Day
- b) Passing of Joyce Izzi former Highland Township Clerk

7. Public Comment

Memorandum

To: Highland Township Board of Trustees
 From: Rick Hamill, Supervisor
 Date: February 6, 2023
 Re: Cleaning Company for New Township Hall

We received four quotes from Cleaning Companies for the new Township Hall. The quotes were annually; \$43,200 from Oakland Commercial Cleaning, \$24,960 from Top Notch Cleaning Services, \$12,228 from 2 Mom's and a Mop, and \$11,880 from AABS.

We have used Top Notch in the past for our Township Hall and currently use Top Notch for our Sheriff Substation and Senior Center Annex. We are very satisfied with their services.

I recommend hiring Top Notch Cleaning Services to Clean the new Township Hall for \$24,960 per year plus additional cleanings at \$260 per cleanings.

Re: Request for variance of Maximum Road Length

For your consideration is a request for a variance on the maximum road length for the proposed Mantua Farms development on Middle Road. The Private Road Ordinance sets a maximum length for a dead end road at 1300 lineal feet. This is to limit the travel distance for emergency response in residential developments. The Township has in the past considered variances when several conditions are met:

- There is no practical secondary outlet
- The density of the development is low and the spacing between driveways is adequate to keep the potential for conflicts on the road at a minimal level
- The roadway itself is constructed to modern standards to accommodate two-way traffic with no significant topographic challenges
- First response agencies have no objections.

There is only one other location that is physically feasible for a second road connection—through Mallard Landing, which is a private drive. Staff facilitated a meeting between the applicant and the leadership of the adjacent Homeowner’s Association and can attest that there was a well-considered discussion of conditions under which a connection might be allowed. The membership of the HOA rejected the proposal, however; this leaves no feasible option on the east side of the property.

I have discussed the proposal with Lieutenant Snyder and with the Fire Marshal, and both support the request for variance. The Planning Department finds that this is a reasonable request at this density of development, and also supports the variance. The road approach has been approved by the Road Commission for Oakland County in its proposed location. The Township engineer is reviewing the drawings and finds the concepts acceptable. The Zoning Administrator has reviewed the proposed land division and approval of the variance is one of the last remaining issues barring approval.

Warm inside. Great outdoors.

Michael Mantua 1 (248) 202-6911
2591 Overbrook Highland, MI 48357 www.mantuafarm.com

Highland Township Board,

Please consider this letter for acceptance of 3,154' road length of the paved Mantua Farms road. This length is necessary given the landscape of the property and the inability to have another road outlet.

Mantua Farms is a 18 parcel Land Division act development for deed restricted residential homes to be built ranging from min 2,600sq ft ranches to min 3,200 sq ft two story homes.

Sec. 20-17. - Design and construction standards.

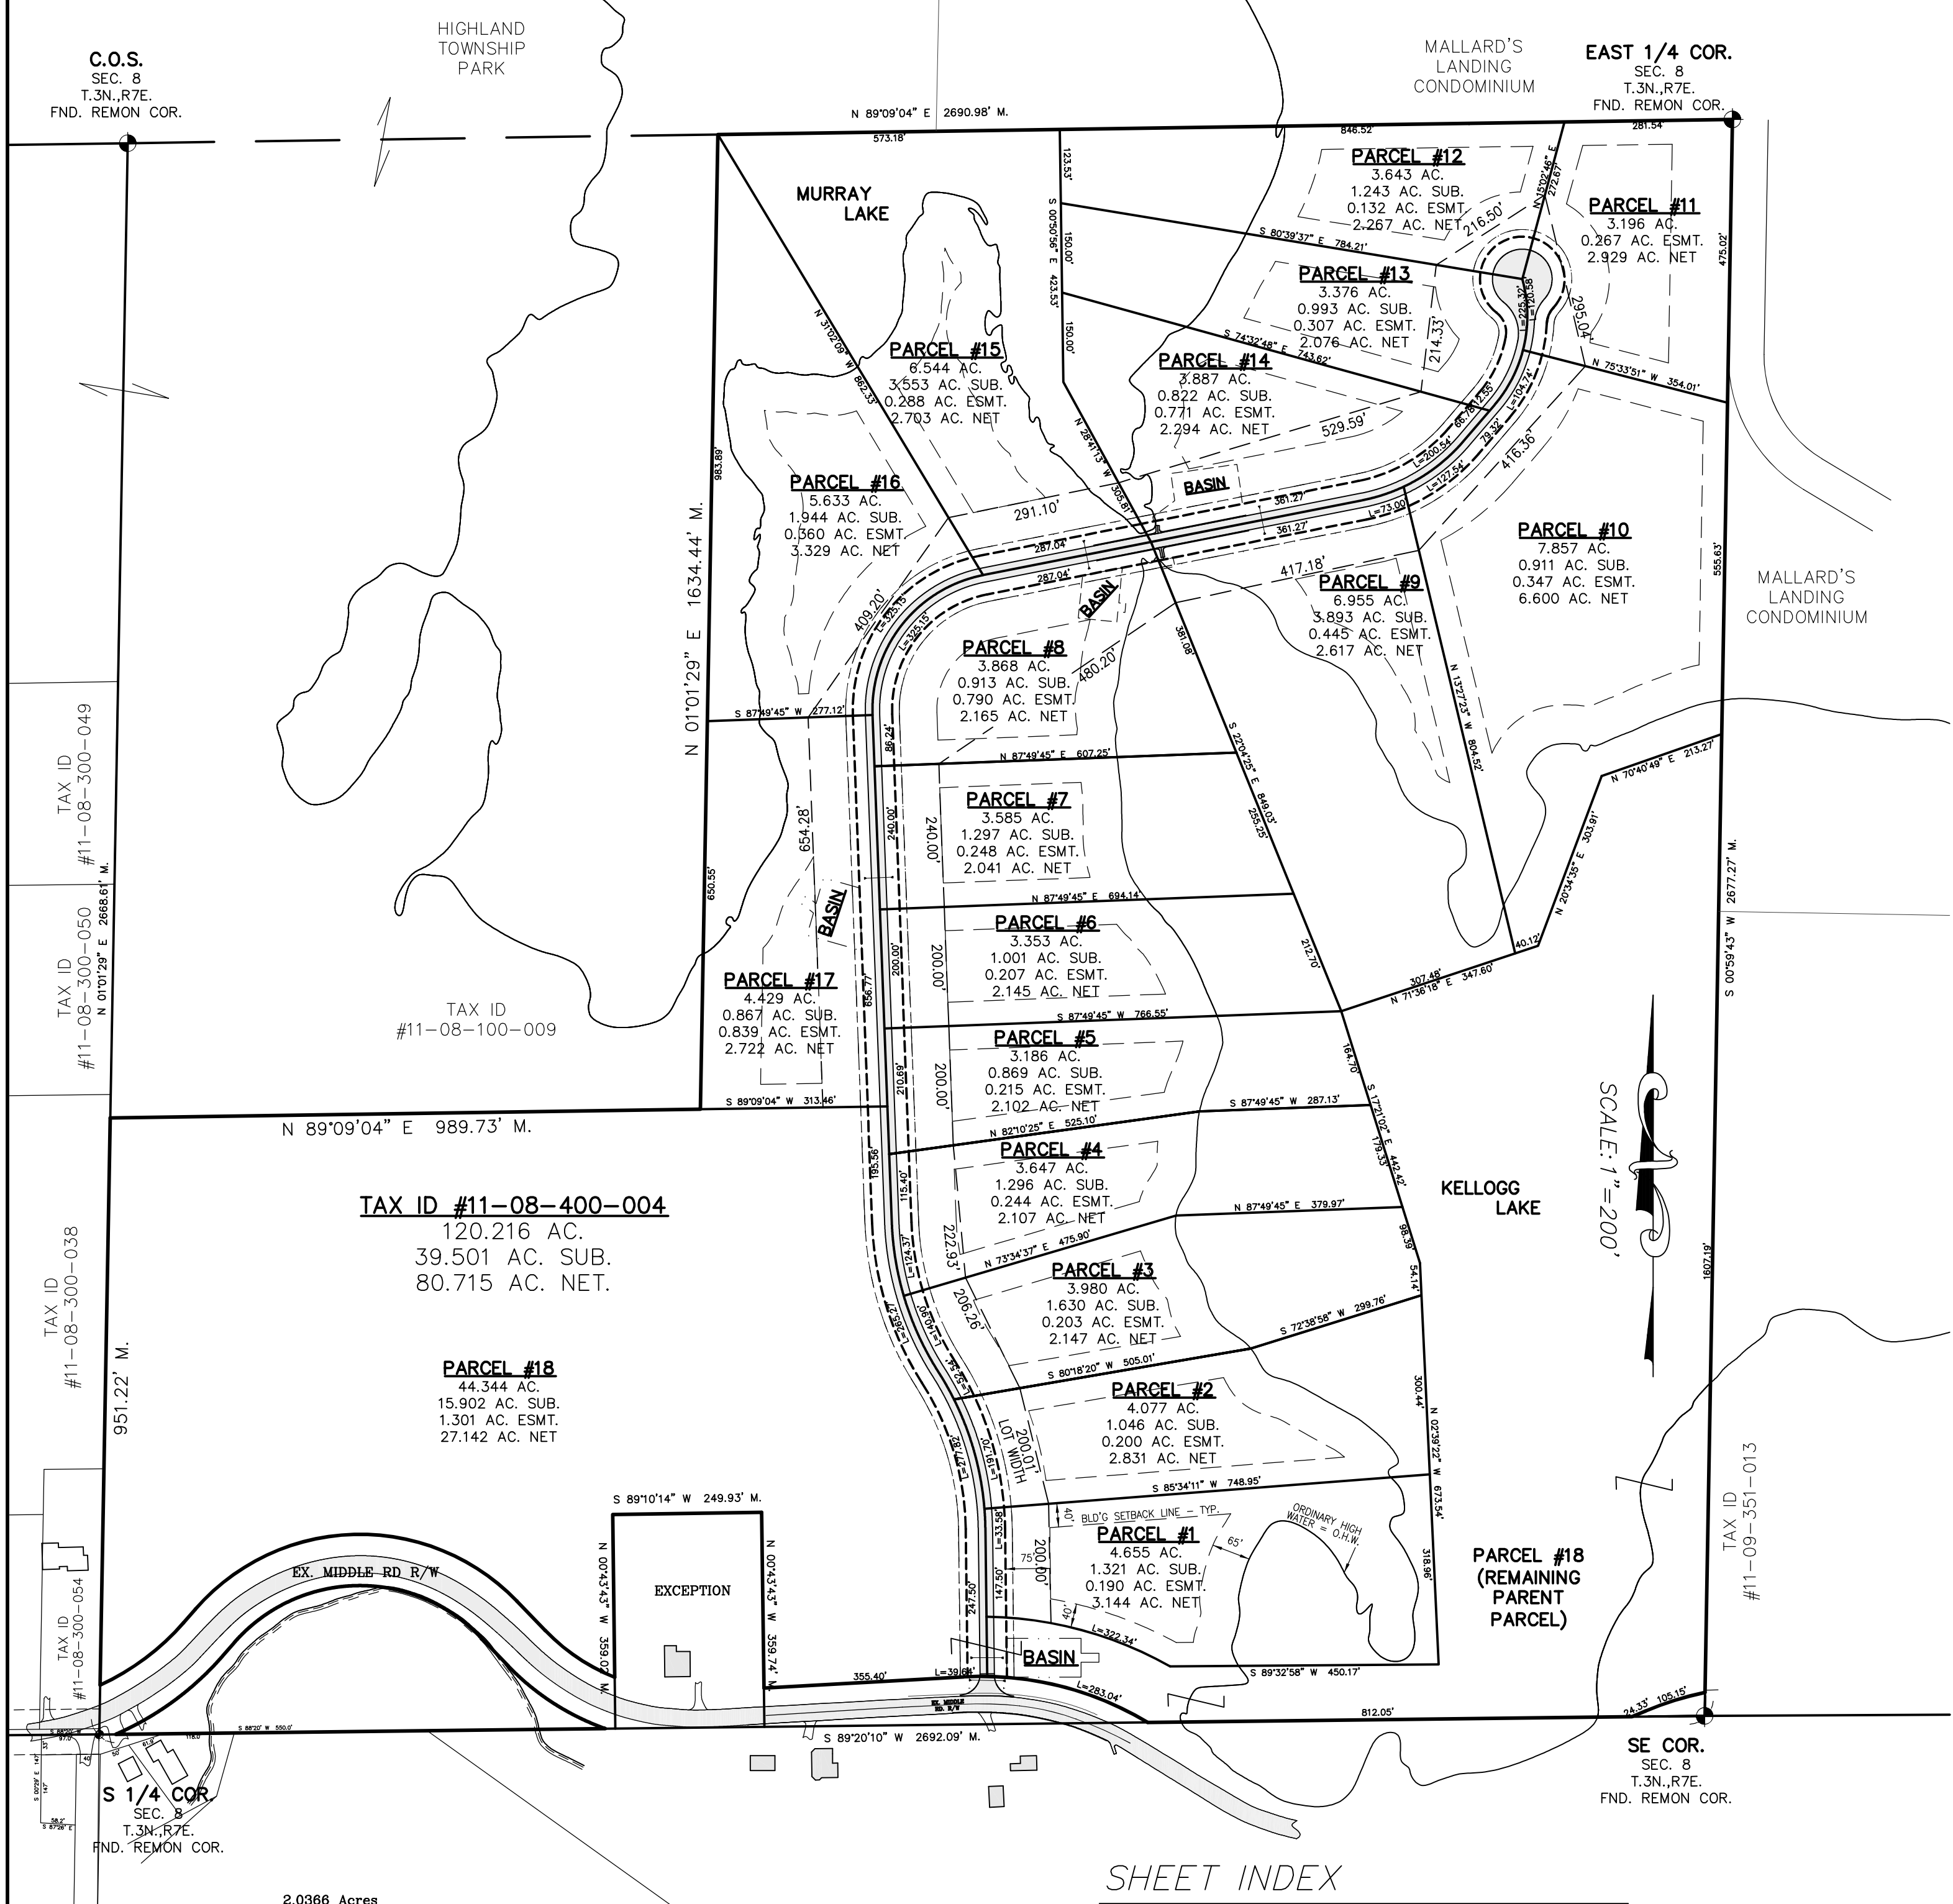

(2)

Maximum road length. The overall length of a single access private road serving eight (8) or more dwelling units shall not exceed thirteen hundred (1,300) feet as measured along the centerline thereof. Where the planning director determines that a practical alternative exists to allow for a future road connection to adjacent properties to provide a second access point, a right-of-way easement for that connection shall be established, although physical development of the road may be deferred to the future, with approval of the board. All single access private roads shall be provided with a cul-de-sac or other approved turnaround constructed in accordance with the engineering design standards, and requirements for fire apparatus access roads under the fire code adopted in article III of chapter 9 of the Highland Charter Township Code as determined by the fire chief.

RE: Road Profile Mantua Farms
File RP23-01
Parcel #11-08-400-004

Dear Mr. & Mrs. Mantua:

Thank you for submitting your application for a private road permit in conjunction with your application for land division. Your land division request will be addressed in a separate letter.

Your application is currently under review, in accordance with the Privet Road Ordinance, by our consulting engineer and fire marshal. We are waiting for their comments. In the meantime, you should be aware that the proposed road length exceeds the requirement of the Ordinance and additional work is needed to complete the road and drainage maintenance agreements. We will address the agreements in a separate letter.

The plans appear to generally meet with ordinance requirements except for one major design standard. According to Code of Ordinances, Chapter 20, Section 20-17 of the Private Road Ordinance the maximum length, as measured along the center line is 1,300 feet. As proposed, the overall length is approximately 3,154 feet. Section 20-22 outlines the procedure for requesting variances. Variance requests are heard by the Board of Trustees. A request submitted by January 31, 2023 before 4L00 p.m. would be heard at the February 6, 2023 Board of Trustees meeting.

If you have any questions, please feel free to call. You can reach me at (238) 887-3791, ext. 126 or burkhartl@highlandtwp.org.

Very truly yours,

Lisa G. Burkhart, AICP

Re: Revised Engineering Design Standards

For your consideration is the adoption of revised Engineering Design Standards, which govern the design of construction projects in Highland Township. For the most part, the changes address minor procedural changes that have come about through the advent of technology. The only significant change is the adoption of the Oakland County Water Resources Commissioner's (WRC) Stormwater Engineering Design Standards.

The new standards rely heavily on groundwater infiltration, and limit volumes and rates of stormwater released from a site to reduce flooding impacts downstream. For the most part, any significant development in Highland Township is already held subject to these standards, since these standards are prerequisite to obtaining a soil erosion control permit, issued through OCWRC. Adoption of this resolution brings us into compliance with Highland Township's own NPDES permit issued by Michigan Department of Environment, Great Lakes and Energy (EGLE.) The WRC standards address all the minimum water quality measures required under our NPDES Stormwater Permit. The WRC standards also apply throughout our neighboring communities, which allows developers to better anticipate what might be required of a project.

RESOLUTION #23-03: ADOPT ENGINEERING STANDARDS

At a regular meeting of the Township Board of the Charter Township of Highland, Oakland County, Michigan, held in the Township Hall on February 6, 2023 at 6:30 p.m.

Present:

Absent:

The following resolution was offered by _____ and seconded by _____:

WHEREAS, the Township Board of Trustees deems to establish minimum engineering standards to guide the construction of public and private improvements to protect and safeguard the public peace, health and safety of its residents, and the integrity of its natural environment; and

WHEREAS, Engineering design practices, construction materials and methods, and other best management practices have changed since Highland Township first adopted the "Charter Township of Highland Design and Construction Standards" on July 27, 1983 and subsequent revisions (including the most recent standards adopted by resolution on September 22, 2010); and

WHEREAS, Highland Township residents have consistently reaffirmed their desire to maintain a rural environment and natural open spaces, thus leading the Planning Commission to adopt the use of the Low Impact Development Manual published by the Southeast Michigan Council of Governments (SEMCOG) through reference in our zoning ordinance; and

WHEREAS, Highland Township is required to comply with water quality standards imposed by the National Pollutant Discharge Elimination System through its Phase II Stormwater Permit (Certificate of Coverage MI0059709) for its discharge from its Municipal Separate Stormwater System (MS4) and

WHEREAS, the Oakland County Water Resources Commissioner has developed, in conjunction with neighboring counties, a comprehensive stormwater engineering standard that addresses all the minimum measures required under the NPDES permit for MS4's to meet statewide water quality standards;

IT IS THEREFORE RESOLVED, that the Highland Township Board of Trustees, hereby resolves to adopt Engineering Design Standards (dated February 2, 2023) and through reference therein adopt the Stormwater Engineering Design Standards developed by the Oakland County Water resources Commissioner, as amended.

Ayes:

Nays:

Abstentions:

RESOLUTION DECLARED ADOPTED

Rick A. Hamill, Supervisor

Tami Flowers, MiPMC Clerk

STATE OF MICHIGAN)
COUNTY OF OAKLAND)

I, the undersigned, the duly qualified and elected Clerk of the Charter Township of Highland, Oakland County, Michigan, do hereby certify that the foregoing resolution was adopted by the Township Board of Trustees at a regular meeting held on the 6th day of February, 2023.

Tami Flowers, MiPMC Clerk

Highland Township Engineering Design Standards

These Engineering Design Standards are intended to provide a reasonable basis for design of public and private improvements in Highland Township. They are not intended as a substitute for sound engineering judgment. The Standards may not apply to all conditions, and alternate solutions shall be permitted as approved by the Township's Engineer.

 APPENDIX A SAMPLE INSURANCE REQUIREMENTS	

Highland Township Engineering Design Standards

1. GENERAL

- 1.1 Complete improvement plans bearing the seal of a licensed Professional Engineer, Surveyor or Architect licensed to practice in the State of Michigan shall be submitted prior to review and approval of any portion thereof.
- 1.2 A certified boundary survey of the site, prepared and sealed by a licensed Professional Surveyor licensed to practice in the State of Michigan, or a copy of the completed plat shall be submitted with the engineering drawings.
- 1.3 Plans submitted shall be on 24" x 36" white prints having blue or black lines and shall be neatly and accurately prepared. Judgment should be exercised in the design, layout, and the presentation of proposed improvements. Electronic version of the plans should be made available for submittals as requested.
- 1.4 For projects or subdivisions having more than one sheet of plans, a general plan having a scale of 1" = 100' shall be provided showing the overall project and indicating the size and general location of all improvements shown in the detailed plans.
- 1.5 Street names, street and easement widths, lot lines, lot dimensions, lot numbers and ownership shall be shown on all plans.
- 1.6 Elevations shall be on U.S.G.S. Datum. Two (2) permanent bench marks for the work shall be indicated on the plans.
- 1.7 Any areas that are considered to be "wetlands" as defined by the Department of Environment, Great Lakes and Energy (EGLE) shall be indicated on the plans. No improvements will be allowed in wetlands unless the EGLE issues a permit, or a letter of "No Authority", for such improvements.
- 1.8 Finished grade shall be indicated for all structures.
- 1.9 The developer or their engineer shall be responsible to forward plans for approval to any private utility company (gas, electric, phone, cable, etc.) and any Federal, State or County (Water Resource Commissioner, Road Commission, etc.) agency whose facilities or rights-of-way may be affected by the proposed construction. Public utilities will require the review and approval of the Township prior to submittal to the permitting agency.
- 1.10 It shall be the developer's engineer and contractor's responsibility to verify the existence and location of all underground utilities and to utilize the MISS DIG system prior to construction.
- 1.11 All engineering construction plans shall contain the latest version of the applicable Highland Township Standard Detail Sheets or the Oakland County

Water Resource Commissioner (if applicable) and the developers/owners name(s), address, and phone number.

- 1.12 An Engineer's Opinion of Construction Cost must be supplied with the Construction Plan submittal. This estimate will be used by the Township to establish review and inspection fees for the improvements in accordance with the Township Ordinance.
- 1.13 All utility trenches under the 45 degree zone of influence line of existing or proposed pavements, bike paths, sidewalks or drive approaches shall be backfilled with sand compacted to at least 95% of maximum unit weight.
- 1.14 Utility crossings of paved roadways will be required to be bored. Open cutting of paved roadways will not be permitted.
- 1.15 An itemized quantity list will be required for all proposed utility improvements (water main, sanitary sewer, storm sewer, paving).
- 1.16 The developer shall submit to the Township one (1) set of complete construction plans for review and an electronic file in .pdf format. After the plans receive approval, additional plan sets may be required.
- 1.17 ***Plan Review and Construction Process***

Site Plan Reviews

Consultant review of the preliminary site plan including water supply, wastewater disposal, storm water management, wetlands, site grading, pavement improvements and right-of-way improvements. Review comments will be issued to the Township Planning Commission for discussion at Planning Commission meetings. Once the Site Plan has been accepted by the Planning Commission, the Applicant will be required to submit Engineering Drawings and an itemized cost estimate of the proposed improvements so that an escrow account may be established for plan reviews and construction observation.

Engineering Plan Reviews

Consultant review of the Engineering Plans for conformance to Township Engineering Design Standards. Once the plans are in an acceptable form, the plans will be issued as approved construction plans. The Applicant will be responsible to apply for all required County and State permits including soil erosion, water supply, wastewater disposal, right-of-way, wetlands, etc. Public water main and sanitary sewer improvements will require the submittal of plans and permit applications for review and approval to be forwarded to the governing agency by the Township Engineering Consultant.

Development Agreement and Performance Guarantee

Prior to the commencement of site improvements, the Applicant shall enter into a development agreement with the Township outlining the scope of the project, the commitments of the Applicant in respect to completing work and protecting

natural features, a schedule and cost opinion. The Applicant will be required to establish a performance guarantee (cash deposit or irrevocable letter of credit) in an amount equal to fifty percent of the cost of the site work. The agreement also outlines the rights of the Applicant as regards occupancy, changes of use and transfer of ownership. This requirement for the development agreement is found in the Highland Township Zoning Ordinance, Section 3.12.

Pre-Construction Meeting

Once the approved engineering plans have been issued, a pre-construction meeting with the Applicant or their representative is required prior to the start of any site work. This meeting will verify that all relevant permits have been applied for, that the proper insurance is provided, and to schedule construction observation. A sample of the required insurance is included in Appendix A.

Site Construction and Observation

Once construction begins, the following construction observation is required:

- Roadways and parking lots including subgrade, aggregate base, curb and gutter, pavement installation, sidewalks and bike paths.
- Storm sewer installation and underground detention/retention systems.
- Water main installation and testing.
- Sanitary sewer installation and testing.
- Retaining wall installation.
- Additional construction observations may be required by the Township.
- The developer will be required to provide density testing for all public utility construction and work within the public road right-of-way.

Bond Inspections and Final Inspections

As development progresses, the Applicant may periodically request that the Township perform a site inspection to evaluate whether the performance guarantee may be reduced or if the completed work is sufficient to allow for a temporary certificate of occupancy. At the time of occupancy, the performance guarantee must be at least 150 percent of the remaining work items. The performance guarantee will be released upon final acceptance and grant of permanent occupancy certificate.

Record Drawing Plan Review

Record drawings describing the location and elevations of the proposed site improvements are required to be submitted for review and approval. See Section 8 of the Township Engineering Design Standards for Record Drawing Requirements.

2. WATER MAIN

2.1 *General*

- 2.1.1 If the proposed improvements include the construction of public water main, the developer shall submit a set of water main only plans (including the water main standard detail sheets) with a completed EGLE permit application for water supply systems. This information will be forwarded by the Township's Engineer to the Oakland County Water Resources Commissioner (WRC) and the EGLE for permitting.
- 2.1.2 All water system improvements shall be designed in accordance with the current edition of "Recommended Standards for Water Works" (a/k/a Ten State Standards).
- 2.1.3 Water mains in new developments shall be installed from boundary to boundary in abutting roads and interior streets, and at other locations and sized as may be deemed necessary by the Township for future extensions.
- 2.1.4 An itemized quantity list for all proposed water main construction must be included on the plans.
- 2.1.5 All public water mains must be located within a 20 foot wide easement or public road right-of-way. Easements should extend 10 feet beyond any hydrant. Sketches and descriptions of both the parcel and easement will be required. The documents shall contain a provision to prohibit the construction of any above ground structures within the limits of the easement.

2.2 *Design Requirements*

- 2.2.1 The distribution system in all developments requiring more than 600 feet of water main shall have a minimum of two connections to a source of supply and shall be a "looped" system. Water mains are to be looped whenever possible. The ability to serve at least 2,000 gpm in single-family detached residential; 3,000 gpm in apartment, cluster residential and similar complexes, institutional, and school areas; and at least 4,000 gpm in office, industrial and shopping centers is essential.
- 2.2.2 Eight (8) inch minimum diameter mains will be installed in single family residential areas.
- 2.2.3 Twelve (12) inch mains are considered to be the minimum size in commercial, office, industrial, and multiple family residential areas except in a looped system of 1,500 feet or less where eight (8) inch mains may be permitted.
- 2.2.4 Water mains are to be looped whenever possible. Interconnection to existing public water supply systems is encouraged.

- 2.2.5 Hydrant leads longer than 20 feet must be eight (8) inches.
- 2.2.6 No service leads are allowed to extend from a six (6) inch hydrant lead.
- 2.2.7 Profile view is required for all sizes of watermains.
- 2.2.8 Water mains shall be kept on one side of the street for the entire length of the street. Water mains shall not be located under pavement or under cul-de-sacs.
- 2.2.9 Gate valves shall be spaced at a maximum of 800 feet intervals on distribution lines. They shall be spaced such that not more than four valves need to be turned off to isolate any section of the water main.
- 2.2.10 Sufficient valves shall be placed such that not more than 20 single family homes, 30 multiple family units or two (2) hydrants shall be out of service within a section of isolated water main.
- 2.2.11 Dead-end mains must end with a hydrant and a gate valve and well. All stubs for future looping must include a gate valve and well.
- 2.2.12 Gate valves should not be located under roadway pavement, bike paths, sidewalks or driveway approaches when possible.
- 2.2.13 Four (4) inch and larger valves are required to be installed in a gate well, except for six (6) inch hydrant shut off valves.
- 2.2.14 In single family residential areas, hydrants shall be spaced along the water main a maximum of 500 feet. In no case shall a house be more than 350 feet from a hydrant. Commercial, industrial, and multiple family spacing shall be a maximum of 400 feet.
- 2.2.15 Along major roadways and in areas other than single family residential, hydrant spacing shall be a maximum of 500 feet.
- 2.2.16 In commercial and industrial areas, the exterior of buildings shall be no further than 300 feet from a hydrant, nor closer than 35 feet, measured along shortest feasible exterior route for laying hose. There shall be a fire hydrant located within 150 feet of any building fire department connection.
- 2.2.17 Where possible, hydrants shall be located at the lot corners, but no closer than eight (8) feet from any driveway or driveway approach.
- 2.2.18 Hydrants located in parking areas shall be protected with a six (6) inches (minimum) concrete curb or standard guard posts.
- 2.2.19 When connecting to an existing water main, a tapping sleeve, gate valve and well will be required unless connection to the existing main can be made without interrupting service on the main.

- 2.2.20 The plans shall indicate the finish grades of all hydrants and gate well rims.
- 2.2.21 Water mains shall be located so as to provide a minimum of ten (10) feet horizontal clearance between the nearest edge of the water main and the nearest edge of any sanitary or storm sewer.
- 2.2.22 A minimum vertical clearance of 18 inches shall be maintained between the top or bottom of any water main and the top or bottom of any sewer or utility. Vertical clearance of less than 18 inches will require concrete encasement of the sewer or utility.
- 2.2.23 Restrained joints shall be used at all bends, tees, hydrant shoes, plugs and caps where necessary to prevent lateral movement of the water main. Thrust blocks will not be allowed unless required by the permitting agencies.

2.3 *Materials*

- 2.3.1 All water main 18 inch diameter and smaller shall be Ductile Iron pipe, Class 54. Two (2) brass wedges shall be used per joint.
- 2.3.2 Highland Township standard valve is East Jordan Iron Works C500 or C515, series A, Left Hand Open. All valves shall be resilient seated and conform to AWWA C509 Standards.
- 2.3.3 Hydrants shall be East Jordan Iron Works 5-BR traffic model with a five (5) inch Storz Pumper and two (2) 2.5 inch National Standard Thread Hose nozzles.
- 2.3.4 Restrained joints shall be Megalug or FieldLok gaskets.
- 2.3.5 Push-on type joints shall be Super Bell Tite or Tyton or approved equal.

2.4 *Installation*

- 2.4.1 All water main shall be installed with a minimum cover of five-and-a-half (5.5) feet below finish grade or top of curb (or road centerline if uncurbed) where the main is parallel to a road. When water mains must dip to pass under another utility, the sections which are deeper than normal shall be kept to a minimum length by the use of vertical bends properly restrained.
- 2.4.2 The contractor will fill, disinfect and pressure test all new water main construction under the supervision of Highland Township and/or its agent.

- 2.4.3 Before any water main will be accepted by the Township, it must pass a pressure test complying with the current specifications and procedures of the Township. The maximum loss of water for the 2-hour hydrostatic test shall be 11.65 gallons, per inch diameter of main, per mile of pipe over a 24-hour period.
- 2.4.4 Before any water main system will be accepted by the Township, the fire hydrants must be brush coated with Glamortex 501 Enamel, color 314 Vermillion (fire hydrant red) paint or approved equal.
- 2.4.5 Gate well covers shall be East Jordan Iron Works No. 1040 or approved equal with the text "Highland Township Water" embossed on the surface.
- 2.4.6 Refer to the standard detail sheets for additional material and construction standards.

3. SANITARY SEWER

3.1 *General*

- 3.1.1 If the proposed improvements include the construction of public sanitary sewer, the developer shall submit a set of sanitary sewer only (with sanitary standard details) plans with a completed EGLE permit application for wastewater systems. This information will be forwarded by the Township's Engineer to the proper agencies for permitting.
- 3.1.2 All sanitary sewer improvements shall be designed in accordance with the current edition of "Recommended Standards for Wastewater Facilities" (a/k/a Ten State Standards). A sanitary sewer basis of design is required to be included on the plans for all sanitary sewer extensions.
- 3.1.3 A grease interceptor will be required for all food service operations. No connections for domestic waste will be allowed to the interceptor.
- 3.1.4 Downspouts, weep tile, footing drains, sump pump discharges, or any conduit, that carries storm or ground water shall not be allowed to discharge into a sanitary sewer.
- 3.1.5 An itemized quantity list for all proposed sanitary sewer construction must be included on the plans.
- 3.1.6 Sanitary sewers will be required across the entire frontage of the site.
- 3.1.7 All public sanitary sewers must be located within a 20' wide easement or public road right-of-way. Easements should extend 10 feet beyond the last manhole. Sketches and descriptions of both the parcel and easement will be required. The documents shall contain a provision to prohibit the construction of any above ground structures within the limits of the easement. The easement width may be increased depending on the proposed sewer depth, soil conditions or adjacent facilities.

3.2 *Design Requirements*

- 3.2.1 At all connections to the Township 's Sanitary System or extension thereto, in the first manhole upstream from the connection, provide a water-tight bulkhead with a 1" diameter pipe through the bulkhead for measuring infiltration immediately upstream. Also a one foot sump at the base of the manhole shall be provided.
- 3.2.2 The minimum allowable size of a public sanitary sewer is 8" diameter.

3.2.3 The following table of minimum slopes and maximum manhole (MH) spacing for sanitary sewers shall be adhered to:

<u>Size</u>	<u>Minimum Grade</u>	<u>MH Spacing (Max.)</u>
8"	0.40%	400 Feet
10"	0.28%	400 Feet
12"	0.22%	400 Feet
15"	0.15%	400 Feet
18"	0.12%	500 Feet
21"	0.10%	500 Feet

3.2.4 The last upstream run of sewer must be at a grade of 1.00% or greater.

3.2.5 The minimum slope for 6" diameter building leads is 1.00%. Cleanouts are required every 100 feet and at all bends.

3.2.6 A monitoring manhole is required on the sanitary lead for all non-residential connections to the sanitary sewer system. The monitoring manhole can only have one (1) lead running through it. It must be located on a straight run of lead and can not be a manhole on a public sewer main.

3.2.7 Each building structure shall have a separate individual sanitary service lead connected to a public sanitary sewer.

3.2.8 Sanitary sewers will not be approved in the rear lot easement.

3.2.9 The following information shall be indicated on the sanitary sewer profile:

- a. Length of run between manholes.
- b. Type, class, size and slope of pipe.
- c. Class of bedding.
- d. Rim elevation of all manholes.
- e. Existing and proposed ground elevation line above the route of the sewer.
- f. A logical numbering system for manholes shall be included.
- g. Invert elevations of all sewer at manholes.
- h. Location and limits of sand backfill where required.
- i. Location and elevations of crossings with other utilities.

3.2.10 Provide a minimum depth from top of curb (or road centerline if uncurbed) to the top of any sanitary sewer of 9 feet at locations where the sewer grade is parallel to the road grade. Under any design the sewer shall be deep enough to reasonably serve, by gravity, a standard depth basement.

3.2.11 Sanitary sewer shall be placed on the opposite side of the street from the water main, and shall have a horizontal separation of at least 10 feet.

3.2.12 External drop connections are required at manholes where the invert of

the outlet pipe is 18 inches or more below the invert of the inlet pipe. Internal drop connections will not be allowed.

- 3.2.13 Where the proprietor must extend the sanitary sewer from off-site, the proprietor shall extend sanitary sewer leads to the property line of all adjacent property on both sides of the right-of-way the entire length of the off-site sanitary sewer extension.
- 3.2.14 In new subdivisions, all service leads shall be sand backfilled and extended a minimum of ten (10) feet past the property line or to the easement line.
- 3.2.15 The plan and profile view of the proposed sanitary sewer shall generally be shown on the same sheet.
- 3.2.16 Maximum flow velocity for pipe flowing full shall be maintained by matching the eight-tenths point of the diameter depth above invert for pipe size increases.
- 3.2.17 Provide a drop of 0.10 feet in the downstream sewer invert for a direction change of 30 degrees or greater to compensate for velocity head loss of the incoming flow.

3.3 *Materials*

- 3.3.1 Service leads installed with the lateral sewer shall be a minimum of 6 inches in diameter and shall be Schedule 40 PVC or SDR 23.5.
- 3.3.2 New sanitary sewer manholes must be water-tight and shall be pre-cast sections with modified grooved tongue joints with rubber gaskets, conforming to A.S.T.M. Designation, C-478. Also, a butel rubber coating around the casing and cone shall be provided for all new manholes as noted on the Township 's or its agent's standard detail sheet.
- 3.3.3 Main line sewer shall be PVC Truss pipe, Solidwall SDR 26, or RCP, C-76, Class IV or V, or approved equal.

3.4 *Installation*

- 3.4.1 No sanitary sewer installation or portion thereof shall have infiltration exceeding 100 gallons per inch diameter per mile of pipe per 24 hour period.
- 3.4.2 Each end of a service lead shall be marked by setting a 2" square wooden stake vertically above the end of the lead.
- 3.4.3 Each tee or end of service lead shall have water-tight and airtight stopper of compatible joint material and shall be adequately braced to withstand exfiltration and/or air test pressure.

- 3.4.4 When existing manholes are to be tapped, a hole of the appropriate diameter shall be core drilled through the wall of the manhole. A watertight fitting shall be used to connect the pipe into the manhole.
- 3.4.5 A minimum of 30 days after installation and prior to acceptance, all sewers shall be subjected to infiltration, air or exfiltration tests, or a combination thereof, in accordance with the following requirements, prior to acceptance of the system by the Highland Township and prior to removal of the bulkhead.
- a. All sewers over 24" diameter shall be subjected to infiltration tests. All sewers of 24" diameter or smaller, where ground water level above the top of sewer is over seven (7) feet, shall be subjected to an infiltration test.
 - b. All sewers of 24" diameter or less, where the ground water level above the top of the sewer is seven (7) or less, shall be subjected to air tests or exfiltration tests.
- 3.4.6 A minimum of 30 days after installation and prior to the acceptance of new mainline sanitary sewer systems, a televised inspection of each section of the mainline shall be conducted from manhole to manhole. DVD video and log of this inspection shall be submitted to the Township's Engineer to document the current condition of the sanitary system at the time of the utility acceptance. The DVD and log shall be consistent with the Standards of the Township of Highland.

4. STORM SEWER

4.1 *Design Requirements*

- 4.1.1 Storm sewer systems shall be designed for a ten year intensity rainfall. The Rational Method for arriving at storm sewer runoff shall be used. An "n" value of 0.013 shall be used for concrete pipe.
- 4.1.2 The formula for a ten (10) year rainfall intensity shall be equivalent to $I = 175/(T+25)$ in which T is the time of concentration (minutes), and I is the intensity (inches per hour).
- 4.1.3 The initial T is generally 20 minutes for residential areas and 15 minutes for high runoff areas.
- 4.1.4 The consulting engineer shall use the following minimum values for "C", the runoff coefficient, in the "Rational Formula" of computing storm water flows ($Q = CIA$).

Impervious Hard Surfaces	C = 0.90
Gravel Surface	C = 0.50
Vegetated/Turf Surface	C = 0.20

Other values of the runoff coefficient may be used or required at the discretion of the Township's Engineer for such areas as parks and open-spaces or unusual sites.

- 4.1.5 Sufficient capacity shall be provided in the storm sewer system to take fully developed tributary upstream drainage into the system. When a storm sewer is designed to provide capacity for upstream areas, the hydraulic gradient shall remain in the pipe.
- 4.1.6 Storm sewer design calculations, including a drainage area map shall be included on the engineering plans. The storm district map shall show all on-site and off-site drainage districts. A minimum 1" = 50' scale is allowed. The district limits must be over laid on a proposed grading plan for the site.
- 4.1.7 All public storm sewers must be located in a public right-of-way or an easement. The minimum storm sewer easement shall be 12 feet. The easement size will vary as required for maintenance and access. Any storm sewer that accepts runoff from abutting property or public right-of-way must be placed in a minimum 12 foot storm sewer easement.
- 4.1.8 If a storm sewer is designed to take on-site drainage only, the hydraulic gradient must be no higher than one (1) foot below ground. When the hydraulic gradient is above the top of the sewer pipe, the design elevation of the hydraulic gradient shall be indicated on the profile at each manhole.

4.1.9 Storm water quality measures, including channel protection volume/rate and flood control measures must be incorporated into the design of the storm sewer system. Stormwater detention is necessary for all developments in the Township. See Section 5, Storm Water Quality Measures, for details.

4.1.10 Manholes shall be located as follows:

- a. All changes in alignment
- b. Points where the size of the sewer changes
- c. Points where the grade of the sewer changes
- d. The junction of sewer lines
- e. Street intersections or other points where catch basins or inlets are to be connected.

4.1.11 Manhole and catch basin spacing for storm sewers shall be as follows:

<u>Diameter of Sewer</u>	<u>Maximum Spacing</u>
12" – 15"	300 ft.
18" - 21"	350 ft.
24" - 30"	400 ft.
36" & 42"	450 ft.
48" & larger	500 ft.

4.1.12 The minimum size of a public storm sewer is 12 inch diameter. 10 inch diameter pipe will be allowed for sewer lines that pick up footing drain or roof conductor drainage. No open covers will be permitted for a 10 inch diameter storm sewer.

4.1.13 Connection must be made at manholes or catch basins. Blind taps are not allowed.

4.1.14 The following information shall be indicated on the storm sewer profile:

- a. Length of run between manholes.
- b. Type, class, size and slope of pipe.
- c. Class of bedding.
- d. Rim elevations of all manholes.
- e. Existing and proposed ground elevations above the route of the sewer.
- f. A logical numbering system for manholes shall be included.
- g. Invert elevations of all sewers at manholes.
- h. Locations and limits of sand backfill, where required.
- i. Locations and elevations of crossing with other utilities.

- 4.1.15 The following table of minimum slopes for storm sewers shall be adhered to:

Size and Minimum Slope

12" @ 0.32%
15" @ 0.24%
18" @ 0.18%
21" @ 0.14%
24" @ 0.12%
27" @ 0.10%
30" @ 0.09%
36" @ 0.07%
42" @ 0.06%
48" @ 0.05%

- 4.1.16 The minimum velocity may not be less than 2.5 feet per second in a pipe flowing full. The maximum velocity in storm sewers shall be ten (10) feet per second. The contents of a larger pipe will never be discharged into a smaller line even though the slope may be steeper for the smaller line. This principle does not apply, however, to a restricted opening or discharge.
- 4.1.17 Where possible provide a minimum of three (3) feet of cover from the top of curb (or road centerline) to the top of any storm sewer.
- 4.1.18 For subdivisions, storm sewers shall be located in the public road right-of-way or in easements adjacent to the public road right-of-way. Storm sewers shall not be located in rear yards except to pick up rear yard drainage or for sump pump discharge lines.
- 4.1.19 At all pavement catch basins and inlets, forty (40) lineal feet (twenty in each direction) of six (6) inch edge drain shall be constructed at the back of curb line in each direction, backfilled with pea gravel and includes fabric. Additional edge drain may be required as directed by the Township Engineer.
- 4.1.20 No more than 1.0 acre of area shall be tributary to one standard catch basin. Catch basins may be placed side by side in order to provide for additional capacity.
- 4.1.21 A maximum of 900 feet of drainage is allowed to any catch basin from two (2) directions.
- 4.1.22 Where lateral storm sewers are proposed, all new homes must be constructed with sump pumps which discharge to an underground pipe connected to an underground public rear yard drain or storm drain. The sump pump discharge lead shall be a minimum of four (4) inch diameter and shall be constructed to each lot in a new subdivision. The lead shall be constructed at a minimum 1.0% grade and connected to a structure. No blind taps are allowed.

4.1.23 The minimum grade for swales and ditches shall be 1.0%. All ditch slopes greater than 3.0% will require sod vegetation. Ditch slopes greater than 5.0% will require rip rap and/or check dams.

4.2 *Materials*

4.2.1 Pipe for storm sewers within the public right-of-way shall be C-76 reinforced concrete pipe conforming to Classes IV or V.

4.2.2 Pipe outside the influence of the public right-of-way may be double-walled, High Density Polyethylene (HDPE) with smooth interior and annular exterior corrugation meeting requirements of ASTM F2306. Special bedding and backfill will be required.

4.2.3 Joints for storm sewer shall be tongue and groove premium joints with rubber gaskets.

4.2.4 All lead material shall be schedule 40 PVC.

4.2.5 Storm manholes are to be a four foot (4') diameter minimum with an eccentric cone. Catch basins are to be a minimum four feet (4') diameter with a two (2) foot sump and an eccentric cone. Inlets may be a two (2) foot diameter. All storm structures must conform to ASTM C-478.

4.3 *Installation*

4.3.1 All storm sewers shall be installed on Class "B" bedding or better.

4.3.2 A pre-fabricated bar screen shall be installed on all storm sewers eighteen (18) inch in diameter and larger.

4.3.3 Refer to the standard detail sheets for additional material and construction standards.

4.3.4 HDPE sewers will require deflection testing with a nine point mandrel a minimum of 30 days after installation. At no point will the pipe have out of round deflections greater than five (5) percent of normal pipe diameter.

5. **STORM WATER QUALITY MEASURES**

5.1 ***General***

- 5.1.1 Highland Township is subject to storm water quality requirements in its Municipal Separate Stormwater System (MS4) under its certificate of coverage (COC) under the National Pollutant Discharge Elimination System (NPDES). Under this permit, any project located within the Township's MS4 must strictly comply with requirements under that COC. Parcels that discharge to Town Center Boulevard, Beach Tree Farm Circle and the Township office complex at N John St and Livingston are located within the MS4.
- 5.1.2 All development and redevelopment projects located inside and outside the regulated MS4 are subject to the Oakland County Water Resources Commissioner's (WRC) current stormwater Engineering Design Standards. Where a project is otherwise exempt from the WRC Stormwater Rules, the Township design requirements herein will apply.
- 5.1.3 Detention basins shall be designed to detain improved storm water over the developed areas on site. The applicant is not required to detain water from off site areas in the drainage district.
- 5.1.4 Alternative designs that comply with design principals outlined in the Low Impact Development Manual (LID) published by the Southeast Michigan Council of Governments (SEMCOG) may be considered provided they achieve the minimum water quality standards outlined in the standards.

5.2 ***Design Requirements***

- 5.2.1 The outlet pipe from a detention basin shall be restricted to allow only the agricultural run-off. The allowable discharge rate is limited to 0.2 cfs per acre when the water level in the detention basin is at its design high water elevation.
- 5.2.2 Leaching systems may be designed with a maximum infiltration rate of six (6) inches per hour and store a volume equal to a 100-year storm. Sufficient data must be available to support the use of a leaching system. In no case shall the infiltration rate be greater than 0.2 cfs per acre. A form of sediment control must be provided with all leaching systems.
- 5.2.3 Sediment control system must provide 80% removal of the annual total suspended solids (TSS) based on a 100 micron particle size and treat 100% of the runoff from the 1-year/24-hour storm event. Rain events in excess of the 1-year/24-hour event must bypass the system without causing re-entrainment of floatable contaminants.
- 5.2.4 A minimum of 12 inches of freeboard must be maintained for all

systems. All building openings must be above the freeboard elevation.

- 5.2.5 All basins shall be required to be designed to drain by gravity unless designed with a permanent water elevation. Detention basins designed to utilize pumps for dewatering will not be permitted.
- 5.2.6 Where a retention basin will be utilized, it is the developer's engineer's responsibility to provide documentation to confirm that the soils in the area of the basin can infiltrate at a minimum rate of six (6) inches per hour. In no case shall the infiltration rate be greater than 0.2 cfs per acre. This information shall appear on the construction plans. A leaching basin will be required for all retention systems unless the ground water level is within two (2) feet of the outlet.
- 5.2.7 All open detention basins must be fenced if the side slopes exceed 1 vertical to 5 horizontal. This may be waived by the Township if the design of the basin is an integral part of the landscaping and the location and depth does not present a potential hazard. The maximum side slope for a basin with fencing shall be 1 vertical to 3 horizontal.
- 5.2.8 A 20 foot wide access easement must be provided to all basins.
- 5.2.9 An agreement for the long term operation and maintenance of detention / retention facilities must be completed by the developer and submitted to the Township prior to final acceptance of the record drawings. Standard maintenance agreement forms can be secured from the Township.

5.3 *Materials*

- 5.3.1 Fences shall be a minimum of 6 feet high vinyl clad chain link with a locking access gate, 8 feet wide. Alternate types of fencing may be permitted, for aesthetic purposes, subject to approval by the Township.
- 5.3.2 Rip-rap is required at all pipe entrances and exits to the basin. The minimum width of the rip-rap shall be twice the outside diameter of the pipe. The rip-rap shall extend from bottom of the basin to the top of the slope. Acceptable material for rip-rap includes field stone or broken concrete of six (6) inch minimum thickness.

6. **GRADING**

6.1 ***General***

- 6.1.1 A grading plan is required for all developments. Rear yard storm drainage systems are required for all residential projects.
- 6.1.2 The grading of the proposed development shall not create drainage problems, or make existing drainage problems worse, on adjacent property. If necessary, storm drains shall be extended to the adjacent property to alleviate drainage problems.
- 6.1.3 A building permit shall not be issued until a grading plan has been submitted to the Township and approved.
- 6.1.4 A soil erosion permit is required for all earth disruption within 500 feet of lakes or wetlands, any earth disruption over 1.0 acre, or as deemed necessary by the permitting agency.

6.2 ***Design Requirements***

- 6.2.1 First floor and basement (where applicable) elevations for each proposed structure or building shall be shown on the plans.
- 6.2.2 The grades of existing adjacent houses, buildings, drainage structures and streets shall be shown. The actual surveyed grades of existing adjacent ground and yards shall be shown on a grid pattern up to a minimum of 100 feet from the property line. The drainage pattern of all adjacent existing land shall be indicated.
- 6.2.3 The grading plan shall be designed to insure that if a failure or overflow occurs within the storm system, water will drain away in overland swales without flooding houses.
- 6.2.4 Finished grade shall be compatible with the grades of surrounding houses, roads, yards and with the existing ground at the proposed house. Finished grade set below the crown of the road will require that all stormwater is intercepted and routed so that it does not adversely impact any buildings.
- 6.2.5 All existing and proposed ground grades are to be in tenths of a foot.
- 6.2.6 Rear yard swales shall be no longer than 400 feet before being intercepted by a catch basin and shall have a minimum grade of 1.0%.
- 6.2.7 The proposed side yard swale elevation shall be shown between all houses. This elevation must be a minimum of 0.5 feet below the lower adjacent house grade. The side yard swale must have a minimum slope of 1.0% to the front and rear.

- 6.2.8 General direction of flow of the rear yard drainage and swales must be indicated with arrows.
- 6.2.9 The maximum allowable grade shall be 1 vertical to 4 horizontal.
- 6.2.10 Sites reclaimed from mining operations shall have a maximum slope of 1 vertical to 5 horizontal and 1 vertical to 6 horizontal to a depth of four feet if the slope is below a normal water level.
- 6.2.11 The first 20 feet of lawn areas along lakes or ponds shall be graded ~~flat~~ with minimal fall or have a 25 foot undisturbed natural area to protect the water body from lawn fertilizers.
- 6.2.12 The proposed ground elevations shall be indicated at each lot corner and top of curb or edge of pavement.
- 6.2.13 The maximum driveway slope is 8.0%. The slope of the driveway shall be labeled on the plans.
- 6.2.14 All proposed retaining wall designs will require review by the Township Engineer on an individual basis.

7. PAVING & PRIVATE ROADS

7.1 *General*

- 7.1.1 For both public and private roadways proposed in the Township, the Road Commission for Oakland County's (RCOC) design standards for subdivisions will be utilized as the basis for the design unless modified in this section.
- 7.1.2 Alternative paving designs may be submitted to the Township for consideration. They will be reviewed by the Township's Engineer and recommendation will be made to the Township. Such alternative paving designs shall only be acceptable in those instances where the Township finds that the proposed design will provide an acceptable level of serviceability, ease of maintenance and are consistent with other paving in similar areas elsewhere in the Township.
- 7.1.3 For roads under the jurisdiction of Michigan Department of Transportation (MDOT) or Road Commission for Oakland County (RCOC) all improvements shall be designed to meet their requirements.
- 7.1.4 Acceleration, deceleration and passing lanes are required at all road entrances that front on paved major roads. These improvements shall be designed to RCOC standards.
- 7.1.5 Alternate horizontal and vertical alignments may be considered with written approval from the Township Fire Department.

7.2 *Design Requirements*

- 7.2.1 The minimum outside radius of a cul-de-sac (back of curb) shall be fifty (50) feet. The back of curb inside radius shall be twenty (20) feet. All right-of-way radii shall be sixty (60) feet minimum.
- 7.2.2 A boulevard section may be allowed in an enlarged right-of-way. Pavement widths shall be at least twenty-four (24) feet for all boulevard streets (back of curb to back of curb). The distance from the property line to curb shall be sixteen (16) feet on boulevards. The island width shall be sixteen (16) feet. The nose of the boulevard island shall be set back at least twelve (12) feet from the edge of pavement of the intersecting street.
- 7.2.3 The minimum driveway width providing one-way traffic shall be no less than 16 feet (back of curb to back of curb). The minimum width for two-way traffic shall be 27 feet (back of curb to back of curb).
- 7.2.4 Vertical curves are necessary when a change in grade of 1.0% or more occurs. The minimum length of vertical curve shall be 100 feet. All proposed vertical curves shall meet County standards for subdivisions.

- 7.2.5 The minimum pavement vertical grade for roadways shall be 0.60% when concrete curb and gutter is provided, 0.80% with open ditch and the maximum allowable grade shall be 8.0% for curb and gutter and 6.0% for open ditches. The maximum cross slope grade for cul-de-sac is 3.0%. At street intersections, grades shall not exceed 3.0% for a distance of 100 feet.
- 7.2.6 All proposed roadways shall be profiled and shall include:
- a. Elevations at each station for the top of curb, or at centerline if not curbed.
 - b. Existing ground elevations at the center of the right-of-way, and 30 feet either side of the centerline.
 - c. Station and elevations of all high points, low points, grade-breaks and necessary information at vertical curves. Grades for vertical curves must be indicated at twenty-five (25) foot intervals.
 - d. The station and top of curb grade of all pavement catch basins and inlets.
- 7.2.7 The pavement radius at all intersections of all roads shall be a minimum twenty-five (25) feet. Industrial developments will require a minimum radius of thirty-five (35) feet.
- 7.2.8 Finish grade of all structures shall be indicated in the plan and profile views.
- 7.2.9 The minimum aggregate cross-section for a gravel road is eight (8) inches. The minimum pavement cross-section for a residential road is three (3) inches of bituminous on eight (8) inches of aggregate.
- 7.2.10 The minimum commercial parking lot pavement cross-section is three (3) inches of bituminous on eight (8) inches of aggregate or seven (7) inches of concrete. The minimum pavement cross-section for industrial developments shall be four (4) inches of bituminous on eight (8) inches of aggregate or eight (8) inches of concrete.
- 7.2.11 Industrial street cross-sections will be reviewed on an independent basis.
- 7.2.12 Safety paths and sidewalks will be required along the frontage of developments as directed by the Township. Safety paths are required along major thoroughfares and shall be three inches of bituminous pavement on four (4) inches of 21AA aggregate a minimum of eight (8) feet wide. All sidewalks are to be concrete and a minimum of four (4) inches thick on four (4) inches of Class II sand, and minimum of six (6) feet wide.

7.3 Materials

- 7.3.1 Roadway surface material for private gravel roadways shall be 21AA aggregate.
- 7.3.2 The aggregate base material for paved private roads and parking lots shall be 21AA aggregate.
- 7.3.3 The bituminous mixture for private roads shall be ~~MDOT 1300~~ meet current MDOT standards.

7.4 Installation

- 7.4.1 The installation of private roads within the Township shall require inspection by the Township Engineer at the following stages:
 - a. After the sub grade has been rough cut to the plan elevation.
 - b. After the placement of the aggregate base or aggregate roadway surface, prior to curb and gutter installation (if required).
 - c. Full-time during the placement of the bituminous pavement (where applicable).
 - d. After all the required vegetation has been established.

8. RECORD DRAWINGS

8.1 *General*

- 8.1.1 All projects within the Township shall be required to submit record drawings. The drawings will need to be reviewed and approved by the Township Engineer prior to final acceptance of the project by Highland Township.
- 8.1.2 The initial submittals shall be of two (2) sets of black line prints providing the applicable information shown on the attached checklist. The minimum scale shall be 1"=50' and shall bear the seal of a registered professional engineer or surveyor licensed to practice within the State of Michigan. All record lengths and elevations must be shown on the drawings and labeled as record with an accuracy of \pm one foot.
- 8.1.3 After the record drawings have been approved by the Township Engineer, the applicant shall submit an electronic copy of the plan set.

8.2 *Water System*

- 8.2.1 Locate gate valves, wells, hydrants and all water system appurtenances from the nearest property corner using an X-Y coordinate system.
- 8.2.2 Itemized As-Built quantities list, which indicates the size, type, brand name and lengths of water main used. Hydrants, gate valves, blow-off valves and appurtenances must also be listed showing their type, brand name, model number, and quantity.
- 8.2.3 Additional information may be required by other permitting agencies.

8.3 *Sanitary System*

- 8.3.1 Indicate the length of sewer, invert elevation, lead locations, rim elevation, percentage of grade, manhole location from the nearest property corner (using an X-Y coordinate system), sewer material and joints used.
- 8.3.2 Itemized As-Built quantities list, which indicates the size, type, brand name and lengths of pipe used.

8.4 *Storm System*

- 8.4.1 Indicate length of sewer, invert elevation, rim elevation, percentage of grade, manhole location from the nearest property corner (using an X-Y coordinate system), sewer material and joints used.

- 8.4.2 As-built storm system plans are required to be accompanied by a letter (8.5" x 11") signed and sealed by the design engineer stating that the detention/retention basin is properly sized according to the approved construction plans, and that the outlets are properly located and sized.
- 8.4.3 Itemized As-Built quantity list, which indicates the size, type, brand name and lengths of pipe used.

8.5 Roadways

- 8.5.1 Provide top of curb elevations for each lot corner (and side lot corner for corner lots). Developments with open ditches will require edge of pavement elevations.
- 8.5.2 Provide an as-built cross-section of the roadway.

Appendix A

Sample Insurance

Sec. 20-17. Design and construction standards.

Except as provided in section 20-22 below, private roads shall be constructed in accord with the Engineering Design Standards. The construction of private roads shall be certified by an engineer licensed to practice in Michigan as meeting said Standards and Specifications as set forth therein. The following are minimum acceptable standards and the Township may require a private road to meet higher standards (such as the inclusion of geotextile fabrics, added bituminous mixture depth, placement of concrete curb and gutter or similar measures) if necessary to protect the interests of the citizens of the Township:

- (1) *Easement.* The private road shall be located within a minimum sixty (60) foot wide easement, properly recorded with the Oakland County Register of Deeds. Additional easement width may be required to accommodate the construction and maintenance of the road, drainage facilities or appurtenant structures such as bridges, culverts and guardrail, based upon recommendation of the Planning Director or Township Engineer. A minimum radius of 60 foot is required for the easement to accommodate a residential cul-de-sac. For alternative turn-around arrangements, adequate easement width must be provided based upon the recommendation of the Planning Director or Township Engineer.

The road shall be physically centered within the private road easement. The Zoning Administrator shall have the authority to allow exceptions to the placement (such as minor deflections) to protect natural features such as significant trees or wetland edges upon recommendation of the Planning Director or Township Engineer.

Private road easements shall be established and located such that no nonconforming conditions or dimensions are created upon any parcel. Private road easements must be placed along parcel lines such that no part of a parcel is isolated from the rest of that parcel by the road easement.

- (2) *Maximum road length.* The overall length of a single access private road serving eight (8) or more dwelling units shall not exceed thirteen hundred (1,300) feet as measured along the centerline thereof. Where the planning director determines that a practical alternative exists to allow for a future road connection to adjacent properties to provide a second access point, a right-of-way easement for that connection shall be established, although physical development of the road may be deferred to the future, with approval of the board. All single access private roads shall be provided with a cul-de-sac or other approved turnaround constructed in accordance with the engineering design standards, and requirements for fire apparatus access roads under the fire code adopted in article III of chapter 9 of the Highland Charter Township Code as determined by the fire chief.
- (3) *Pavement and road cross-section.* A private road which is to serve sixteen (16) or more residential lots, or condominium units shall be provided with a paved surface in accordance with the engineering design standards. A private road which will serve fewer than sixteen (16) residential lots may be constructed with an aggregate base and wearing surface. All design elements and construction specifications, such as width, pavement, base and subbase materials and thicknesses, cross slopes and drainage requirements shall be based on the engineering design standards. Specifications related to cross-section may be modified with the approval of the planning director upon review and recommendation of the township engineer based on an analysis of proposed use and existing field conditions, provided that the proposed cross-section equals or exceeds the calculated strength of the standard pavement cross-section. The township board may grant a temporary waiver of the pavement requirement set forth in this subparagraph for a proposed private road that would intersect with an unpaved road.

In the event a private road approved under the terms of this section is to be extended such that sixteen (16) or more parcels are served, the entire length of the existing and extended private road shall be provided with a paved surface.

Sec. 20-22. Variances and deferrals.

- (a) A variance may be granted by the township board from regulatory provisions of this private road ordinance when all of the following conditions are satisfied:
- (1) A literal application of the substantive requirement would result in exceptional, practical difficulty to the applicant;
 - (2) The alternative proposed by the applicant will be adequate for the intended use and shall not substantially deviate from the performance that would be obtained by strict enforcement of the standards;
 - (3) The granting of the variance will not be detrimental to the public health, safety or welfare, nor injurious to adjoining or neighboring property, nor contrary to the overall purpose and goals of the private road ordinance.
- (b) The township board may grant a deferral of any requirement of the private road ordinance to a future date or until a specific event or condition occurs. Such deferrals shall specify the date or event or condition that triggers the requirement for full compliance. The township board may require a performance guarantee such as an irrevocable letter of credit or cash bond to ensure future compliance.

(Ord. No. 457, § 1, 7-12-2017)

Memorandum

To: Highland Township Board of Trustees

From: Rick Hamill

Date: 1/06/2023

Re: Building License with Western Oakland Transportation Authority

With the passage of the Oakland County Transportation Millage, WOTA has requested to lease/license the former fire station #1 to house their operations. This frees up the space and parking that WOTA was using in the Highland Station House.

The building is 6250 square feet and the lease/license rate is \$4.00 per square foot per year totaling an annual amount of \$25,000 to be paid on or by January 2nd each year of anticipated occupation. The agreement may be automatically extended for additional one year terms, unless terminated as provided in the lease document.

The lease/license documents are attached.

Recommend motion to authorize the Supervisor to sign the License Agreement Between Charter Township of Highland and Western Oakland Transportation Authority (WOTA).

Warm inside. Great outdoors.

**LICENSE AGREEMENT BETWEEN CHARTER TOWNSHIP OF HIGHLAND
AND WESTERN OAKLAND TRANSPORTATION AUTHORITY (WOTA)**

This License Agreement ("Agreement") entered into and effective as of the date of the last signature ("Effective Date"), is by and between the Charter Township of Highland, a Michigan municipal corporation located at 205 N. John Street, Highland, Michigan 48357 ("Township"), and the Western Oakland Transportation Authority ("WOTA"), a Michigan public corporation, located at 250 W. Livingston, Highland, Michigan 48357. Township and WOTA may be referred to collectively as (the "Parties") and individually as a ("Party").

RECITALS:

- A. The Township owns the real property located at 250 W. Livingston Road, Highland Township, Michigan, 48357 (the "Property") and the building located thereon (the "Building").
- B. The Western Oakland Transportation Authority ("WOTA") has requested to use and occupy the Building on the Property, which is approximately 6,250 square feet.
- C. The Township has agreed to allow WOTA to use and occupy the Building located on the Property subject to and as provided in this Agreement.

AGREEMENT:

§1. Grant of License. For, and in consideration of, and subject to WOTA complying with all terms and conditions of this Agreement, the Township hereby grants a revocable license to WOTA to use and occupy the Building. The purpose of the license is to have office, vehicle and maintenance space for the administrative operations of WOTA. WOTA has examined the Property prior to signing this Agreement and knows the condition of the Building. WOTA accepts the Building in its present condition at the date of the execution of this Agreement.

§2. Term of Agreement.

- 2.1. This term of the Agreement shall be for one (1) year and shall commence on January 1, 2023 and end on December 31, 2023 unless this Agreement is terminated earlier as provided herein.
- 2.2. Provided WOTA is not in default, this Agreement may be automatically extended for additional one (1) year terms, unless terminated as provided herein.

§3. Termination/Expiration.

- 3.1. This Agreement does not grant WOTA an interest in the Building or the Property, and as a revocable license that permits use and occupancy of the Building, may be terminated by resolution of the Township Board at any time and without reason, and by the Township Supervisor for cause subject to Township Board ratification. Except for emergencies or when the termination is for cause based on WOTA failing to comply with one or more requirements of this Agreement, the Township agrees to provide WOTA with at least ninety (90) days written notice of the effective date of a termination.
- 3.2. WOTA may terminate this Agreement upon providing the Township with ninety (90) days advanced notice of its intent to terminate the Agreement. WOTA shall be obligated to pay the prorated share of the license fee up to the date it vacates the Building and the Property.

WOTA shall remove all of its fixtures, equipment materials and personal property at the time of vacating the Building and shall return the Building and the Property to its condition prior to its use, allowing for reasonable wear and tear.

- §4. License Fee.** In consideration of WOTA's transportation services provided to residents in the community, which the Township Board of Trustees has determined is a public benefit; WOTA shall pay \$25,000 dollars per year, by January 2nd of each year, as a license fee for the use and occupancy of the Building.
- §5. Use of Property.** The use and occupancy of the Property as permitted by this Agreement is strictly limited to WOTA and its personnel to carry out WOTA's non-profit purpose of public transportation. WOTA's use and occupancy of the Property shall comply with any rules/regulations for use of the Building, as may be adopted or amended from time to time by the Township.
- §6. Township Services and Utilities.** The Township shall provide the following services to WOTA: 1) trash removal from the Building; 2) snow and ice removal for the sidewalks and parking lot; 3) grounds maintenance including lawn, tree and shrub care; and 4) maintenance for the building's HVAC system, heat and water. WOTA shall pay for these services and utilities. The Township shall invoice WOTA on a quarterly basis for its proportionate share of these services and utilities and WOTA shall pay such invoice within thirty (30) days of receipt.
- §7. Equipment and Furnishings.** WOTA shall provide, at its own expense, all communication and telephone systems, internet access, furniture, and equipment it deems necessary for its operation. WOTA shall keep the Building in good repair, reasonable wear and tear excepted, and in a clean and healthy condition. WOTA may not install or make changes to the Building without prior written permission of the Township.
- §8. Insurance.** Although the Township may insure the Building and Property on its general liability insurance coverage, WOTA shall have no right to or expectation of coverage under any insurance policies of the Township. During periods of occupancy, WOTA shall be required to provide commercial general liability insurance covering all operations including occupancy and/or use of the Property with a minimum liability limit of one million dollars per occurrence. It is understood and agreed that the following shall be Additional Insured: The Township, including all elected and appointed officials, all employees and volunteers, all boards, commissions, and/or authorities and their board members, employees and volunteers. It is understood and agreed by naming the Township as additional insured, coverage afforded is considered to be primary and any other insurance the Township may have in effect shall be considered secondary and/or excess.
- §8. Assignment and Subleasing.** This Agreement shall not be assigned, transferred or subleased by WOTA in whole or any part without the prior written approval of the Highland Township Board of Trustees. The Township shall not assign this Agreement without the approval of WOTA.
- §9. Signs.** Upon receiving the Township's prior written approval, WOTA may place signs on the Building.
- §10. Indemnification and Liability.** WOTA agrees to indemnify, defend and hold harmless the Township and its officials, employees, volunteers, and others working on behalf of the Township, against any claims, demands, suits, or loss, including all costs connected therewith, and for any damages, injury or loss to property or persons, including costs and reasonable attorney fees incurred by the Township, which may be asserted, claimed, or recovered against or from the Township, arising from or in connection with WOTA's use or occupancy of the Building or

Property. The Township shall provide WOTA prompt written notice of any claims within the scope of WOTA's obligations under this Section. The Township shall not be responsible for any loss or damage to WOTA's property caused by theft, fire, or any other act of God or third parties.

§12. Notices. All notices, requests, demands, and other communications required by this Agreement shall be in writing and shall be deemed given if personally delivered or mailed, certified mail, return receipt requested, to the following addresses:

To Township: Highland Township
Attention: Supervisor
205 N. John Street
Highland, MI 48357

To WOTA: Western Oakland Transportation Authority
Attention: Director
250 W. Livingston
Highland, Michigan 48357

§13. Relationship of Parties. Nothing contained in this Agreement shall be deemed or construed to create a relationship of principal and agent or of partnership or joint venture between the Parties.

§15. Force Majeure. Each Party shall be excused from any obligations under this Agreement during the time and to the extent that a Party is prevented from performing due to causes beyond such Party's control. Reasonable notice shall be given to the affected Party of any such event.

§16. Reservation of Rights. This Agreement does not and is not intended to, impair, divest, delegate, or contravene any constitutional, statutory, and/or other legal right, privilege, power, obligation, duty, or immunity of the Township.

§17. No Implied Waiver. Absent a written waiver, no act, failure, or delay by a Party to pursue or enforce any right or remedy under this Agreement shall constitute a waiver of those rights regarding any existing or subsequent breach of this Agreement. No waiver of any term, condition, or provision of this Agreement, whether by conduct or otherwise, in one or more instances, shall be deemed or construed as a continuing waiver of any term, condition, or provision of the Agreement. No waiver by either Party shall subsequently affect its right to require strict performance of this Agreement.

§18. Remedies Not Exclusive. The rights, remedies, and benefits provided by this Agreement shall be cumulative, and shall not be exclusive of any other rights, remedies, and benefits, or of any other rights, remedies, and benefits allowed by law.

§19. Invalid Provision. The invalidity or unenforceability of any terms or conditions of this Agreement shall not affect the validity or enforceability of the remainder of this Agreement or the remainder of any terms or conditions. This Agreement shall be construed in all respects as if any invalid or unenforceable terms or conditions were omitted.

§20. Governing Law and Venue. This Agreement shall be construed in accordance with, and subject to, the laws of the State of Michigan. To the extent provided by law and court rule, any action at law, suit in equity, or other judicial proceeding for the enforcement of this Agreement or any provision thereof shall only be instituted in the Oakland County Circuit Court, the 52-1 District Court, or the United States District Court for the Eastern District of Michigan, depending on the nature of the action, suit, or other proceeding.

§21. Amendment. This Agreement may not be changed, modified, amended, or altered, except by an agreement in writing, signed by both Parties.

§22. Counterparts. This Agreement may be executed in several counterparts, each of which shall be an original and all of which shall constitute one and the same instrument.

§23. Entire Agreement. This Agreement constitutes the entire understanding between the Parties and supersedes all prior offers, negotiations, and/or agreements between the Parties relative to the subject matter addressed herein. WOTA represents that there are no understandings, representations, or promises of any kind, oral or written, that have been made by Township to induce the execution of this Agreement except those expressly set forth in writing in this Agreement.

TO: Highland Township Board
FROM: Ken Chapman, Fire Chief
SUBJECT: Extrication Equipment
DATE: February 6, 2023

Attached, please find a quote for a Hurst E-Draulic combi-tool. Hurst E-Draulic is the brand that we transitioned to in 2018. It is an ALL-IN-ONE battery operated hydraulic rescue tool, also know as the "Jaws Of Life".

This tool is used to extricate patients from a motor vehicle, after an accident. The new device will be placed on Engine 2, the recently purchased fire engine.

It was not our intent to purchase this equipment this year, but thanks to our EMS Coordinator and his outside the box thinking, FF/Paramedic Becker saved nearly \$30,000 on the purchase of monitors and CPR devices that were planned for in this budget. This has put us ahead of the game, and allowed us to purchase the needed equipment earlier.

Please accept and approve the sole provider letter, as well as the included quote for \$13,500 for the Hurst SC358E2 Combi-tool spreader/cutter. The funds will come from (402-336-971.002 Equipment) line, which has monies budgeted for such expenditures this year.

**1600 W. Highland Rd.
Highland, MI 48357
(248)887-9050**

TO: Highland Township Board

FROM: Ken Chapman, Fire Chief

SUBJECT: (2) Stryker Lifepak 15 (Cardiac Monitors)

DATE: February 6, 2023

Attached is a quote for (2) **refurbished** cardiac monitors (Stryker Lifepak 15), and (1) Lifearm mechanical CPR device.

In August of 2020, the Highland Township Fire Department was advised that our previous private ambulance provider would no longer be able to service our community. We had planned for this, and prepared to assume ALS (Advanced Life Support) transport services for our residents.

As we develop and improve services, we would like to make the availability of ALS care a higher probability. With the addition of the (2) cardiac monitors, we will equip ALL of our ambulances to be capable of providing ALS. This would allow us to provide the advanced care whenever there was a Paramedic available.

Also included in this quote is a mechanical CPR device Lifearm Chest Compression System. This will be our third mechanical CPR device, which again will allow us to equip ALL ambulances, giving our residents a greater chance of survivability in the event of a cardiac arrest.

This equipment was budgeted for purchase in the FY 2023 from the Capital budget:

- 402-336-971.002 - Capital Equipment

We request the board approve the attached quote from Master Medical Equipment for the purchase of (2) refurbished cardiac monitors (Lifepak 15 - V4), and (1) Lifearm Chest Compression System for a total of \$44,700. This will be paid from funds in account 402-336-971.002

Also included are comparative quotes for equipment. Because refurbished monitors have limited availability, there are (2) quotes for refurbished and (1) quote for new.

LIFEPAK® 15 monitor/defibrillator

Data Sheet

Ease of use

- More than 20 clearly labeled, dedicated buttons
- Front-facing cables, connectors, and 100mm printer

Clinical effectiveness

- 360J biphasic
- ST-segment trending
- University of Glasgow 12-Lead ECG Analysis Program

Durability

- LIFEPAK TOUGH™
- Dual-layer screen protector
- Large, shock absorbing handle

Reliability

- Upgradeable platform
- Daily, 3AM diagnostic self-test

Specifications

General

The LIFEPAK 15 monitor/defibrillator has six main operating modes:

AED mode: for automated ECG analysis and a prompted treatment protocol for patients in cardiac arrest.

Manual mode: for performing manual defibrillation, synchronized cardioversion, noninvasive pacing, and ECG and vital sign monitoring.

Archive mode: for accessing stored patient information.

Setup mode: for changing default settings of the operating functions.

Service mode: for authorized personnel to perform diagnostic tests and calibrations.

Demo mode: for simulated waveforms and trend graphs for demonstration purposes.

Physical characteristics

Weight:

- Basic monitor/defibrillator with new roll paper and two batteries installed: 7.9 kg (17.5 lb)
- Fully featured monitor/defibrillator with new roll paper and two batteries installed: 8.4 kg (18.5 lb)

Lithium-ion battery: ≤ 0.6 kg (1.3 lb)

Accessory bags and shoulder strap: 1.77 kg (3.9 lb)

Standard (hard) paddles: 0.95 kg (2.1 lb)

Height: 31.7 cm (12.5 in)

Width: 40.1 cm (15.8 in)

Depth: 23.1 cm (9.1 in)

Display

Size (active viewing area): 212 mm (8.4 in) diagonal; 171 mm (6.7 in) wide x 128 mm (5.0 in) high

Resolution: display type 640 dot x 480 dot color backlit LCD

User selectable display mode: full color or SunVue™ display high contrast

Display: a minimum of 5 seconds of ECG and alphanumeric for values, device instructions, or prompts

Display: up to three waveforms

Waveform display sweep speed: 25 mm/sec for ECG, SpO₂, IP, and 12.5 mm/sec for CO₂

Data management

The device captures and stores patient data, events (including waveforms and annotations), and continuous waveform and patient impedance records in internal memory.

The user can select and print reports, and transfer the stored information via supported communication methods.

Report types:

- Three format types of CODE SUMMARY™ critical event record: short, medium, and long
- 12-lead ECG with STEMI statements
- Continuous Waveform (transfer only)
- Trend Summary
- Vital Sign Summary
- Snapshot

Memory capacity: Total capacity is 360 minutes of continuous ECG, 90 minutes of continuous data from all channels, or 400 single waveform events. Maximum memory capacity for a single patient includes up to 200 single waveform reports and 90 minutes of continuous ECG.

Communications

The device is capable of transferring data records by wired or wireless connection. This device complies with Part 15 of the FCC rules, and its operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any

interference received, including interference that may cause undesired operation.

- Serial Port RS232 communication + 12V available
- Limited to devices drawing maximum 0.5 A current
- Bluetooth® technology provides short-range wireless communication with other Bluetooth-enabled devices

Monitor

ECG

ECG is monitored via several cable arrangements:

A 3-wire cable is used for 3-lead ECG monitoring.

A 5-wire cable is used for 7-lead ECG monitoring.

A 10-wire cable is used for 12-lead ECG acquisition. When the chest electrodes are removed, the 10-wire cable functions as a 4-wire cable.

Standard paddles or QUIK-COMBO pacing/defibrillation/ECG electrodes are used for paddles lead monitoring.

Frequency response:

- Monitor: 0.5 to 40 Hz or 1 to 30 Hz
- Paddles: 2.5 to 30 Hz
- 12-lead ECG diagnostic: 0.05 to 150 Hz

Lead selection:

- Leads I, II, III, (3-wire ECG cable)
- Leads I, II, III, AVR, AVL, and AVF acquired simultaneously (4-wire ECG cable)
- Leads I, II, III, AVR, AVL, AVF, and C lead acquired simultaneously (5-wire ECG cable)
- Leads I, II, III, AVR, AVL, AVF, V1, V2, V3, V4, V5, and V6 acquired simultaneously (10-wire ECG cable)

ECG size: 4, 3, 2.5, 2, 1.5, 1, 0.5, 0.25 cm/mV (fixed at 1 cm/mV for 12-lead)

WHEN SECONDS COUNT, TECHNOLOGY MATTERS™

Lifeline ARM

Automated Chest Compression (ACC) for Professionals

REVOLUTIONARY CPR DEVICE IS QUICK AND EASY TO DEPLOY AND USE

Any lifesaving technique demands a high level of excellence in its delivery during an emergency intervention. Such is the case with cardiopulmonary resuscitation (CPR) where a patient's chest compression fraction (CCF) can only be maximized if rescuers provide effective and uninterrupted CPR. In addition, effective manual CPR may be jeopardized, because CPR guidelines become difficult to maintain, as fatigue can occur in as little as 1-2 minutes.

Defibtech is proud to introduce the Lifeline ARM Automated Chest Compression (ACC) device, a mechanical solution when effective manual CPR isn't possible, for example due to a shortage of personnel or during patient transport. When used as an adjunct to manual CPR, it ensures effective CPR for adults with compression depth (2 inches/5 cm) and rate (at least 100 per minute), as recommended in current AHA/ERC guidelines.

The Lifeline ARM ACC device is comprised of a state-of-the-art compression module paired with a specially designed lightweight yet sturdy frame. An innovative motor design ensures efficient and smooth operation of the compression piston, and a smart software driven motor control algorithm

provides accurate CPR rates and compression depth for variable patient chest resistances.

The rigidity of the frame and backboard allow operation without undue deflection or distortion that could compromise consistent compression depth. The Lifeline ARM ACC device, with its intuitive user interface and automated operation, enhances the precision, dexterity, and control needed when performing CPR.

Advanced battery technology allows for unmatched operational times and long service life across a wide temperature range. Flexible power options include efficient battery swapping features and external AC power input. Field upgradable software enhances its serviceability and makes it adaptable to future resuscitation protocol requirements.

The innovative and elegant design of the Lifeline ARM ACC device affords portability, speedy deployment, compressions with or without rescue breaths, and event capture. Defibtech continues to provide superior value, design, and technical innovation in products with powerful features, functions, and ease of use. The results are truly useful products for helping save lives.
